ACTION PLAN (please leave blank):

Physical Activity Readiness Questionnaire - PAR-Q (revised 2002)

PAR-Q & YOU

(A Questionnaire for People Aged 15 to 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

YES	NO								
		1.	Has your doctor ever said that you have a heart condit recommended by a doctor?	ion <u>and</u> that you should only do physical activity					
		2.	Do you feel pain in your chest when you do physical activity?						
		3.	In the past month, have you had chest pain when you	In the past month, have you had chest pain when you were not doing physical activity?					
		4.	Do you lose your balance because of dizziness or do y	ou ever lose consciousness?					
		5.	Do you have a bone or joint problem (for example, ba change in your physical activity?	ck, knee or hip) that could be made worse by a					
		6.	Is your doctor currently prescribing drugs (for exampl dition?	e, water pills) for your blood pressure or heart con-					
		7.	Do you know of $\underline{\text{any other reason}}$ why you should not	do physical activity?					
			w=e :
